Refresh

REACH, A BRAND OF REFRESH · PUBLIC-SERVING DIVISION

One app for your team and the community you serve

REACH gives nonprofits and public-serving organizations a white-labeled mobile home where people find the help they need, and the right help finds them. Benefits, programs, resources, and communication reach every person, in every direction, the moment it matters.

Refresh · Equity · Access · Community · Hub

What is in here. What REACH is and how it works, the nine modules an organization chooses from, and every feature inside them, set against the typical way the same job gets done today. There is also a **PDF of this document**.

CONTENTS

1 What REACH is

2 The modules

3 What REACH adds

SECTION 1

What REACH is

Most of the people an organization serves, and most of the people who do the serving, never sit at a desk. The help already exists, but it sits behind separate logins, paper forms, and emails nobody reads, so access ends up depending on who knows where to look.

REACH puts it on the phone, in one place that carries the organization's own name, so access is equal, the relationship holds between visits, and what an organization already pays for actually gets used. It connects the systems an organization already runs rather than replacing them.

1

Connect

Bring your existing programs, systems, and resources into one place.

2

Unify

Everyone gets one branded home and one ongoing relationship, with no new logins to learn.

3

Reach

The right resource finds the right person, when it counts.

4

Listen

Feedback flows back, so you hear from people as quickly as you reach them.

Reach runs both ways. Organizations reach people instantly. People reach help, and each other. Every partner's local knowledge reaches the whole community.

Resources to find	Resources that find you	Voices that come back
One place to look for benefits, programs, and community help, instead of ten.	The right help surfaces on its own, matched to a person's place, moment, and need.	Feedback, questions, and needs flow back, so the organization learns as it serves.

SECTION 2

The modules

Modules are what an organization chooses and phases in. Most start with one or two, usually from the five marked **Start here**, and add more as adoption grows. A dedicated customer success team handles setup, configuration, and onboarding. The small print on each card names the Refresh modules it includes.

Serves **Team** **Community** **Both**

01
Communications
Immediate reach, in every direction, on the channel each person actually uses. No email needed.

Communications · Chat · Scheduling and Calendar

Start here **Both**

02
Benefits Access
Equal access to every benefit a person can use, from workplace coverage to Medicaid and SNAP, explained in plain language.

Benefits Discovery · Benefits Enrollment · AI benefits assistant

Start here **Both**

03
Community Resources
Local help, prescription and legal assistance, and money skills. Resources to find, and resources that find you.

Local services · Prescription help · Legal aid · Financial wellness

Start here **Community**

04
Health and Wellness
Fitness classes, yoga, HIIT, sleep stories, mindfulness, and nutrition, on demand from the phone.

Wellness

Start here **Both**

05
Rewards, Recognition, and Perks
Perks, discounts, and rewards people value, with kudos and milestones that strengthen relationships and build community.

Recognition and Rewards · Perks

Start here **Both**

06
Challenges and Points
Turn any action into a challenge and reward it with points, with more than 300 challenges ready to launch.

Challenges and Point System

Both

07
Forms and Surveys
Feedback that comes back: forms, pulse surveys, and snap polls, answered in a few taps.

Forms Digitization and Automation · Surveys and Polls

Both

08
Basic Learning Management
Training, life skills, and mental wellbeing lessons that people finish on their phone.

Basic Learning Management

Both

09
Marketplace
Products and services people want, from partners the organization approves first.

Marketplace

Both

Onboarding is a use case, not a module. It is built from the modules: Communications, Forms and Surveys, Benefits Access, and Recognition, working together so a new hire has everything before day one.

For qualifying nonprofits. The REACH grant program delivers the platform at no cost to qualifying nonprofit organizations.

SECTION 3

What REACH adds

The features are what people see inside the modules. Each row sets REACH against the typical way the same job gets done today, and shows who it serves: the team, the community, or both.

Serves Team Community Both

FEATURE	TYPICAL TODAY	WITH REACH	SERVES
THE PLATFORM IN EVERY MODULE			
White-labeled front door Your name, your look	Vendor-branded apps, one per tool	One branded home for everything your people use	Both
iOS, Android, mobile web, and web Every device	A desktop portal, or a different app for every vendor	Native iOS and Android apps plus mobile web and web, all carrying your name	Both
One layer over your systems Thousands of integrations	A portal of tiles, a separate login behind each	Connects HR, payroll, benefits, and the tools you already run into one experience, with no extra logins	Both
Content management system Publish without IT	Updates wait on a web team	Staff publish and update content, resources, and announcements themselves	Team
Segmentation and role-based access Right content, right person	One message and one menu for everyone	Each person sees what fits their role, location, and program	Both
Automated language translation In the language people use	English only, or translation by hand	Content is translated automatically into the language each person uses	Both
Two-way by design Connects in both directions	Messages go out; little comes back	Organizations reach people, people reach help and each other, and feedback flows back to the organization	Both
Portable personal account The account belongs to the person	Access ends when the program or job ends	The person keeps their account, their resources, and the relationship after they move on	Community

FEATURE	TYPICAL TODAY	WITH REACH	SERVES
Data analytics and reporting Beyond activity counts	Reports pulled by hand, after the fact	Real-time participation by team, location, or role, with nudges for the people going quiet	Both
Customer success and 24/7 support Help when it is needed	A ticket queue and a busy help desk	A dedicated customer success team, and admin support around the clock	Team
01 COMMUNICATIONS Start here			
Reach without email Channel matters	Email and flyers that deskless staff and families miss	Push, text, email, and in-app news feed, routed to the channel each person actually answers	Both
Branded news feed One living stream	Updates scattered across tools	Updates, recognition, wellness wins, and announcements in one feed	Both
Chat Conversations in one place	Personal texts and group chats outside any system	Built-in chat, or a connection to the chat service already in use	Both
Scheduling and calendar Segmented scheduling	Paper calendars and phone trees	Full scheduling that works with any calendar: sign-ups, reminders, and check-ins for shifts, trainings, appointments, and classes	Both
02 BENEFITS ACCESS Start here			
Benefits at the right moment Life events	A guide handed out once a year at open enrollment	Personalized, step-by-step journeys surface the right benefit at a life event: a new baby, a move, open enrollment	Team
AI benefits assistant Answers in plain language	Calling HR or the insurer to ask what is covered	A built-in AI assistant explains benefits and coverage in plain language, any time	Team
Benefits enrollment One flow	A separate enrollment site for every product	One enrollment flow across products and third-party systems	Team
Public benefits navigation Medicaid, SNAP, WIC	A referral list, one program at a time	Guides people to Medicaid, SNAP, WIC, and sliding-scale care. The agency and program still decide eligibility.	Community
03 COMMUNITY RESOURCES Start here			
Local help, searchable Free and reduced-cost services	A printed list that goes stale	Free and reduced-cost local services for food, housing, transportation, health, and work, searchable by where a person lives	Community
Help paying for medication Prescription assistance	Skipping or rationing medication because of cost	Programs that lower or cover the cost of prescriptions and medical care	Community
Legal aid Free and low-cost legal help	No idea where to start, and no way to pay	Connects people to free and low-cost legal help for housing, family, work, and benefits problems	Community
Financial wellness Budgeting, debt, and credit	Money stress carried alone	Courses and tools on budgeting, debt, credit, and saving, with free coaching from nonprofit financial counselors	Both
Local knowledge, kept current A commons partners tend	Lives in one staff member's head	Partners add and correct their own local resources, so every community on the network can reach them	Community
Resources that find you Location and situation	Search it yourself, if you know to look	Surfaced on its own, by where a person is and what they are working on now	Community
04 HEALTH AND WELLNESS Start here			

FEATURE	TYPICAL TODAY	WITH REACH	SERVES
Wellness on demand A 100+ hour content library	An assistance line on a breakroom poster	Fitness classes, yoga, HIIT, sleep stories, mindfulness, nutrition, and health management, plus your own content	Both
Wellness reimbursement No paper receipts	Paper receipts and manual review	AI pre-approves receipts, with export to payroll or a direct connection to your expense system	Team
05 REWARDS, RECOGNITION, AND PERKS Start here			
Kudos and milestones Peer to peer or manager to team	Recognition that stays in an inbox	Peer and manager kudos, anniversaries, and milestones on the social feed, automated by tenure or role	Both
Rewards catalog Monetary and non-monetary	Paper certificates, if anything	A customizable catalog of gift cards and non-monetary awards	Both
Perks and discounts Everyday savings	A perks list nobody uses	Giveaways and discounts on services, travel, and live events from leading brands	Both
06 CHALLENGES AND POINTS			
Challenges on demand 300+ ready to launch	A campaign once a year	Any action can become a challenge, and several can run at once, from a library of more than 300	Both
Points for any action Incentives that stick	Participation nobody notices	Points for completing a form, attending a session, or reaching a goal, redeemable for rewards	Both
Wearable integration Activity that counts	Step counts no one sees	Connects to wearables so activity earns points automatically	Both
07 FORMS AND SURVEYS			
Digital forms Delivered in sequence	Paper intake and consent forms	Upload existing forms or build new ones, deliver them to the right groups automatically, and track each response	Both
Surveys and polls Feedback that comes back	One annual survey with low response	Snap polls and pulse surveys, fully automated, with visibility into who opened and who responded	Both
Needs screening Know the need	No shared picture of what people need	SDOH screening and a self-reported needs assessment that shows where to invest	Community
08 BASIC LEARNING MANAGEMENT			
Learning on mobile Short lessons	A desktop system few people open	Compliance training and continuing education people can finish on their phone	Team
Life skills and wellbeing For members and families	Workshops people cannot get to	Financial basics, parenting, health literacy, and mental wellbeing lessons	Community
09 MARKETPLACE			
A curated marketplace You approve every offer	Vendors marketing to your people on their own	Third-party products and services people can buy, each approved by the organization first	Both
USE CASE: ONBOARDING BUILT FROM THE MODULES ABOVE			
Ready before day one Personalized	Binders and a first-week scramble	Benefits, forms, and team connections personalized to role, location, and life stage	Team
Welcome messaging Automated, personal	Ad hoc emails, if any	A manager welcome, team introductions, and benefits reminders at the right time	Team

"Typical today" describes the common shape of standalone tools and portals, not any named product. Features reflect Refresh platform capabilities published at refreshplatform.com and in REACH program materials as of September 2026. REACH is a software platform; it does not make eligibility decisions for any public benefit or program.
