

REACH, A BRAND OF REFRESH · PRODUCT STRATEGY

Close the basics. Lead with what only we do.

What Refresh needs to compete in workplace wellness and wellbeing: what we already have, what to tackle now, what comes next, and where we win.

Strategy brief · about an 8-minute read · October 2026

What is in here. A one-page view of where Refresh stands against wellness and recognition platforms, the 10 items to tackle now, the next version, and why we build rather than partner. There is also a [PDF of this document](#).

SECTION 1

The short answer

Refresh is about 80% of the way to a competitive wellness and wellbeing product.

It already has:

- a challenge engine, points and gift-card drawings;
- peer shoutouts that people actually use;
- guided quests, content, events and forms;
- payroll and HR connections;
- **real services**: KOFE coaching, Findhelp, NeedyMeds and MemberDeals.

The gaps are mostly basics that every competitor treats as standard. Six priorities:

1

Leaderboard privacy

First name and last initial, and "my rank only" on personal challenges.

2

Step sync

Apple Health and Health Connect first, then Fitbit and Garmin.

3

Team challenges and boards by store or region

Teams built from HR data and scored by average per member, plus a shared group goal.

4

Streaks and "X of Y days" challenges

With personal bests.

5

Recognition basics

Likes and comments, plus automatic birthday and work-anniversary posts.

6

Store-floor access and admin reporting

QR posters, a break-room screen mode, and reports by store, manager and region.

Build or partner

We build the engagement features and buy only the device-data connection. We don't partner with or resell a wellness platform.

Where we win

Competitors offer content *about* financial, social and health wellbeing. Refresh connects people to actual help, serves the community as well as staff, and is free to nonprofits.

SECTION 2

Where Refresh stands today

Based on the live Goodwill NE Texas and Goodwill Marion apps (October 2026) and Refresh's sales materials.

AREA	WHAT REFRESH HAS NOW	GAP
Challenges	Daily, weekly and dated challenges; monthly themes; habit check-ins	No streaks, "X of Y days," group goals, team or map challenges
Guided programs	Quests and sequences worth points	None for launch
Points and rewards	Point-based challenges, monthly gift-card drawings, annual giveaway	No manager spot awards; no donating points to charity
Recognition	Shoutouts tied to values and safety, earning points, heavily used	No likes or comments; no automatic birthdays or anniversaries
Leaderboards	Personal and Leaders tabs on each challenge	One organization-wide board with full names; no store, region or team boards
Step tracking	Step challenges point to the mobile app	Supported sources not yet confirmed
Content	Articles, meditation videos, a free-tools marketplace	None for launch
Real services	KOFE, Findhelp, NeedyMeds Rx card, SNAP, LawHelp, crisis lines, career tools, MemberDeals	None: competitors lack this
Workplace tools	Pay, health plan, Teladoc, employee portal, events with sign-up, weekly focus, forms	Calendar add and event check-in
Audiences	Workforce, Community and Public versions	Competitors serve employees only
Access	Invites by text, email or QR; language choice; mobile-first	No break-room screen or kiosk mode
Admin	Dashboard; Refresh manages content, challenges, rewards and messages at launch	Reporting by store, manager and region to confirm

SECTION 3

Who we compete with

The closest competitor is Woliba, an all-in-one wellness, recognition and rewards app for companies of up to about 5,000 staff. Most others lead with one strength.

COMPETITOR	LEADS WITH	WHAT WE LEARN
Woliba	All-in-one: 120+ challenge types, recognition, surveys, events, health assessments, 40+ HR system connections	Its four tiers work as a roadmap. A quarterly ROI report sells to executives. It charges only for employees who sign up.
Wellable	Challenges, recognition and a large rewards wallet	Teams of 3–8 with captains; raffle entries for effort
MoveSpring	Step and activity challenges	The clearest challenge menu; teams scored by average; daily caps
YuMuuv	Social team challenges	Broad device sync; community forums
Vantage Fit / Vantage Circle	Gamified challenges, perks, recognition	Sells white-label versions; panel awards
Personify Health	Enterprise wellness and health navigation	Scale and health-plan ties
Recognition apps (Bucketlist, Guusto, Achievers, Bonusly, Nectar)	Peer recognition and rewards	QR posters and break-room screens for frontline staff; manager gift cards by text; points to charity; nominations

What none of them do: connect people to real local services (food, rent, prescriptions, legal help), serve the community as well as staff, or come free for nonprofits.

SECTION 4

Tackle now: the minimum to compete

#	ITEM	WHY IT MATTERS	BUILD OR BUY
1	Leaderboard privacy First name + last initial, personal opt-out, "my rank only" on sensitive challenges, an on/off switch per challenge Build now	Protects privacy and keeps people at the bottom from giving up	Build
2	Step sync Apple Health and Health Connect first, then Fitbit and Garmin Build now	Standard in every challenge-led competitor; for hourly staff the phone is the tracker	Build phone sync natively; buy a data service for extra devices

#	ITEM	WHY IT MATTERS	BUILD OR BUY
3	Teams and scoped boards Teams from HR data, self-join, a catch-all team; boards by org, region, store and team; show me $\pm$ 5 neighbors Build now	The biggest engagement lever; makes losing safe	Build
4	Group goal challenge Everyone adds to one shared target Build now	Everyone contributes and nobody ranks last	Build
5	Streaks, "X of Y days" and personal bests Build now	Progress without ranking; kinder to shift workers	Build
6	Recognition basics Likes, comments, automatic birthday, anniversary and new-hire posts, manager reminders Build now	A self-sustaining feed from HR data we already sync	Build
7	Store-floor access QR posters, break-room screen mode, shared tablet sign-in Build now	Reaches staff who rarely open apps	Build
8	Admin reporting By store, manager, region and role, with a minimum group size of about 5 and CSV export Build now	Buyers ask "is it working?" first	Build (confirm what exists)
9	Points upgrades Manager spot awards; donate points to charity Build now	Charity giving fits nonprofits	Build
10	Notification controls Build now	Too many alerts is a common reason people quit these apps	Build

A full rewards catalog isn't needed at launch. The monthly drawing is cheaper and suits nonprofits.

How team challenges and leaderboards should work

Teams

- Built from HR data (store, department, region), with self-join and a catch-all team.
- At least 3–4 members, ideally 4–8.
- Optional captains; store managers lead visibly.

Scoring

- Rank teams by average per member, not total.
- Count active members only.
- A daily cap (for example, 20,000 steps).
- Data no more than a day old, plus an end-of-challenge grace period.
- Capped manual entry and an activity converter for people without trackers.

Leaderboards

- Scopes: organization, region, store, team; the default is "my store" or "my team."
- Show me plus five people above and below.
- First name and last initial; opt out as "Teammate"; sensitive challenges show only my rank.
- A Personal tab with streak and personal best.
- Effort earns raffle entries.
- An admin switch per challenge: on, off, or "my rank only."

Challenge types

Status Have Build now Next Later Skip

TYPE	STATUS
Target	Have
Streak	Build now
X of Y days	Build now
Individual leaderboard	Have fix privacy
Group goal	Build now
Team leaderboard	Build now
Habit check-ins	Have
Virtual race or map	Next

SECTION 6

Next version

Borrow what competitors do well, then reshape it around our services and mission.

FEATURE	REFRESH'S VERSION
Needs check Next	A short check people fill out themselves (rent, food, bills, health, childcare, career) that routes straight to Findhelp, KOFE, NeedyMeds or SNAP. Builds on REACH's "Know the Need."
Impact report Next	A quarterly report for boards and funders: resources used, prescription savings, SNAP applications started, coaching sessions, participation compared with staying in the job
Mission challenges Next	"Every 1,000 steps funds an hour of job training"; group goals tied to the mission
Virtual races and maps Next	"Walk the route between our stores"
Personalized journeys Next	Content and challenges by role, location and need
Pulse surveys with trends Next	Anonymous mode, repeat schedule, trend reporting by group, built on Forms
Nominations and awards Next	Digital Employee of the Month with approval steps
Event upgrades Next	Add to calendar, QR check-in for points, photo posts
Later	More wearables, a personal wellness score, manager gift cards by text, a rewards catalog if clients ask

Roadmap at a glance

Close the basics now, then lead with needs and mission

Sequence only: no dates or durations.

Now

Gaps buyers check first

- Leaderboard privacy
- Phone step sync
- Teams, store/region boards
- Group goal challenges
- Streaks and X-of-Y days
- Reactions and milestones
- Break-room screen and QR
- Reports by store, region
- Spot awards; donate points
- Notification controls

Next

Borrow, then make it ours

- Needs check to services
- Impact report for funders
- Mission challenges
- Virtual races and maps
- Personalized journeys
- Pulse surveys with trends
- Nominations and awards
- Event QR check-in

Later

Add when clients ask

- More wearables
- Personal wellness score
- Manager gift cards by text
- Rewards catalog, if asked

Already in Refresh: the foundation

Challenges · Points · Drawings · Shoutouts · Quests · Content · Events · HR sync · KOFE · Findhelp · NeedyMeds

SECTION 8

Where we win, and what we skip

Lead with

- Real services, not articles.
- Three audiences: workforce, community and public.
- Built for frontline staff: text, QR and language choice now; screens and kiosks next.
- Benefits in one place: pay, health plan, Teladoc and the portal next to wellness.
- Free to nonprofits.
- Mission impact: mission challenges and an impact report.

Skip or leave to partners Skip

- Biometric screening and condition programs (leave to the health plan).
- On-demand fitness class libraries (link to free apps).
- Slack and Teams integrations (text messages matter more to deskless staff).
- Lifestyle spending accounts and physical awards.

SECTION 9

Build, partner or learn

The decision. Build the engagement features, buy only the device-data connection, keep partnering for services, and learn from wellness platforms without partnering with them.

OPTION	VERDICT	WHY
Build it ourselves	Yes: challenges, teams, leaderboards, recognition, reporting	Every gap extends the engine we already own
Buy a component	Yes: extra devices only	Phone sync must be native app code anyway. A data service covers Fitbit, Garmin and others; per-user pricing adds up at our scale, so negotiate or build later.
Partner with or resell a wellness platform	No	Heavy overlap, a second app, per-user fees that conflict with the donated model, and no visible reseller program
Partner for services	Yes, keep doing it	KOFE, NeedyMeds, Findhelp and MemberDeals plug into Refresh and keep it the hub
Learn and do something different	Yes	Use competitors' tiers and team rules as a checklist; build our version around needs, services and mission

Confirm with product

- ☐ Which health sources the mobile app reads today.
- ☐ What the admin dashboard reports now, and whether it breaks down by store, manager and region.
- ☐ Whether leaderboards can be scoped and names shortened without new work.
- ☐ How many challenges are in the library and how they're tagged.
- ☐ Whether HR sync carries store, department, birthdays and hire dates.
- ☐ Privacy and agreement review for leaderboards and step data, run in parallel.
